

ENEWS THE SEED OF DISCOVERY™

[Para español haga clic aqui](#)

Welcome to our Origene Seeds E-Newsletter! We will provide you with the latest on our company and products every month. As you know, Origene Seeds is active in research, plant breeding, seed production and marketing of hybrid plant varieties.

The company's strategy is to develop new hybrids with new traits of quality, flavor, uniformity, high nutritional values and environmentally friendly. Our hybrid varieties are suitable for commercial outdoor or greenhouse growers. As well as for plant growers and for professional sectors.

A Message From Our CEO

Dear customers,

Wilderness brings our life a sense of good old times, which is rare to exist in the new modern life. We, in Origene Seeds, work hard in bringing your fields the wild old power of nature with tasty drops of flavor and aromas. Origene's watermelons are crunchy and tasty, with deep red flesh colors, like Ruby crystals; and plant tolerance that survived for at least 5000 years before the Common Era. The hybrids combined both, the old genetic and wild agriculture, with the perfect quality of fruits right from the fields. When you hold our seeds in your hand, you can feel the legacy of nature, covered with timeless Origene qualities.

I bless you all with a good growing season and wonderful results.

Yours,
Eyal Vardi

New Products

Papagayo

The first 'green' Tiger type mini seedless, in the world with intermediate resistance to Powdery Mildew, that will grow in your field with the minimum control required.

News From the Field

Origene Seeds representative Rodrigo Chavez from South Mexico has harvests underway in the states of Jalisco and Colima. Growers are benefitting from strong market prices.

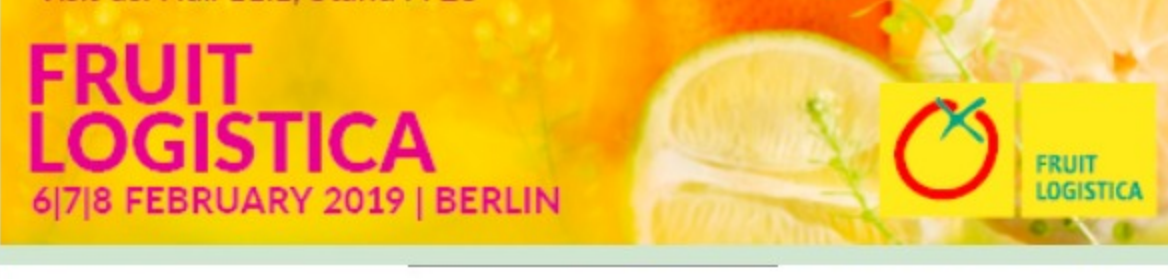

In addition to watermelons and melons, this year we are starting to evaluate our new tomato program.
